DETAILED ACTION

Claims 33-59 are pending.

The restriction requirement mailed 12/05/2005 has inadvertently addressed set of claims which had been previously canceled by a Preliminary Amendment. The Restriction requirement is thereby vacated. The following restriction requirement is being applied instead. The period to respond is restarted.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33,34,35,42, drawn to peptide SEQ ID No. 1, classified in class 530, subclass 350.
- II. Claims 33,34,36,43, drawn to peptide SEQ ID No. 5, classified in class 530, subclass 350.
- III. Claims 33,34,37,44, drawn to peptide SEQ ID No. 9, classified in class 530, subclass 350.
- IV. Claims 45,46,47,56, drawn to peptide SEQ ID No.7, classified in class 530, subclass 350.
- V. Claims 45,46,48,57, drawn to peptide SEQ ID No.10, classified in class 530, subclass 350.
- VI. Claims 45,46,49,58, drawn to peptide SEQ ID No.11, classified in class 530, subclass 350.

VII. Claims 45,46,50,59, drawn to peptide SEQ ID No.12,
classified in class 530, subclass 350.

VIII. Claims 38,39, drawn to method of use of peptide SEQ ID No. 1,
classified in class 514, subclass 02.

IX. Claims 38,40, drawn to method of use of peptide SEQ ID No. 5,
classified in class 514, subclass 02.

X. Claims 38,41, drawn to method of use of peptide SEQ ID No. 9,
classified in class 514, subclass 02.

XI. Claims 51,52, drawn to method of use of peptide SEQ ID No.7,
classified in class 514, subclass 02.

XII. Claims 51,53, drawn to method of use of peptide SEQ ID No.10,
classified in class 514, subclass 02.

XIII. Claims 51,54, drawn to method of use of peptide SEQ ID No.11,
classified in class 514, subclass 02.

XIV. Claims 51,55, drawn to method of use of peptide SEQ ID No.12,
classified in class 514, subclass 02.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-VII are patentably distinct from each other because of the materially different structures of the compounds they are claiming. Consequently, methods of use of these products are also patentably distinct.

Inventions I-VII and VIII-XIV, are related as products and processes of use, respectively. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different processes such as peptide synthesis or production of antibodies.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

If applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims which depend from or otherwise include all the limitations of the allowable product claim will be rejoined. (MPEP 821.04)

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
